## EDUCATION

### Full-stack web development

October 2021 - Jun 2022

Hack Your Future • Training

In my time in the education, I have worked intensively and focused on full stack web programming in recent tech-stack (React, Node, MySQL), including for web and apps. There was a focus on software development, based on software technology and advanced programming. It also included participating in events, workshops, study groups with seniors, working on weekly assignments and projects.

- Intensive learning with fully practical skills on full stack web development
- participate on events, workshops & study-groups with seniors
- working on weekly assignments & projects

### MSc eng ICTE (Innovation Communication Technology and Entrepreneurship)

Feb 2014 - Jan 2016

Aalborg Universitet • Lang videregående uddannelse

During my time on the course, I have studied the unique aspect of the ICTE that included the interplay between the market, different aspects of a user, regulations and the communication technologies. I have worked intensively and focused on innovative engineering solutions using current technologies, including for web and apps, it was a focus on software development that was based on software technology and programming.

### Bachelor in web development

Jan 2012 - Jun 2013

ZIBAT, Campus Roskilde • Professional bachelor

In my time in the education, I have worked intensively and focused on web programming in recent web technologies (HTML and CSS) including CMS (content management system). There was a focus on web page design and development.

## COURSES

### PRINCE2 Foundation

2017 - 2017

PEOPLECERT at [info@peoplecert.org](mailto:info@peoplecert.org)

Through the course I gained a deep understanding of project management with a number of document types, including organizational structure, different roles, activities and responsibilities.
